PCIe®/CXL Analyzers/Excisers/Jammers

Powerful and Versatile PCIe® Testing Solutions

With each generation of PCIe®, speed and bandwidth have doubled, making the testing process more difficult as data capture, storage and visualization processes grow in complexity. PCIe 6.0 presents increased physical challenges with PAM-4 signaling, FLIT mode and protocol complications that need to be tested and validated. VIAVI specializes in configuration and protocol testing/analysis and has introduced some of the most advanced and functional platforms in the industry. Our components are backward-compatible, flexible, cost effective, easy to operate, and accelerate set-up time, testing time and promote speed to market.

Chassis	PCIe4	PCIe5	PCIe6	Lanes
4K4 Analyzer	■			4
4K16 Analyzer/Jammer	■			16
5P8/5P16 - Analyzer/Exerciser/Jammer		■		8/16
5P16 Analyzer + PCIe6 Interposer			■	4
6P4-E - Exerciser			■	4
6P16-AE - Analyzer/Exerciser			■	16
Interposers	PCIe4	PCIe5	PCIe6	Lanes
Exerciser Host Test Stand		■		16
CEM	■	■		4/8/16
CEM U.2	■			4
E1 EDSFF	■	■		8
E3 EDSFF		■		16
U.2	■	■		4
U.3	■	■		4
M.2	■	■		4
Oculink/Slimline	■			4
Slimline		■		8
SFF-8674	■			4
Flying Lead	■			4
OCP2		■		16
CDFP		■		16
MCIO		■		16

New PCIe 6.0 Analysis Platform

The new VIAVI PCIe 6.0 analysis platform will include Analyzers, Exercisers, and Interposers along with an option that enables 64 GT/s PCIe 6.0 trace capture on existing Xgig PCIe 5.0 equipment to extend equipment investments through the early Gen-6 development phase.

Multiple Functions on a Single Platform for Equipment Optimization and Reduced TCO

Our PCI Express® Xgig® PCIe5 platform supports legacy data rates – as well as single or multiple Analyzer, Exerciser and Jammer functions on the same chassis. This approach provides users with the ability to optimize equipment to best meet operational and budgetary requirements.

Port Bifurcation and Simultaneous Multi-User Capability

We have also added Analyzer bifurcation capabilities that enable multiple users and simultaneous tests on same platform for additional operational and cost efficiencies.

Troubleshooting Complex LTSSM Transactions

Increased data rates at PCIe 5.0 and PCIe 6.0 present interoperability challenges when bringing up links. Xgig PCIe Analyzer/Exerciser platforms support advanced LTSSM Override capabilities that provide designers with insight and techniques to troubleshoot these complex transactions with repeatability.

Robust Software Tools Suite for all Xgig Platforms

Xgig Expert™

User-friendly interface that aids in rapid data interpretation, performance analysis and troubleshooting.

Xgig Serialytics™

Builds on Xgig Expert to expose hidden behaviors and events in a trace. Enhances contextual debugging and provides smart analytics for serial protocols.

MLTT

Medusa Labs Test Tools suite is an application-based data and signal integrity testing tool enabling developers to identify, locate and resolve errors through stress testing.

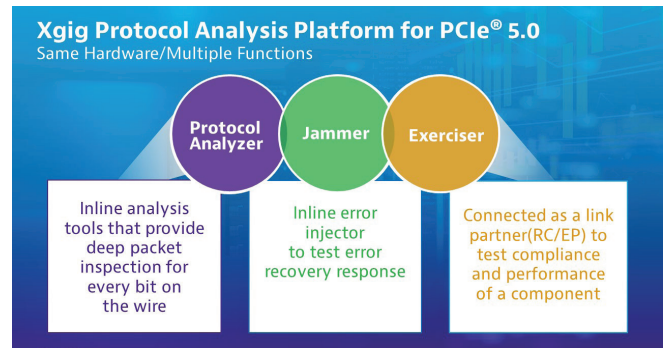

Proud Member of the PCI-SIG®

A PCI-SIG® member company, VIAVI platforms are accepted for PCI-SIG compliance and interoperability testing.

Additional Protocol Support

Our PCIe 5.0 and 6.0 offerings support NVMe and CXL protocols.

A century of leadership for complex test, measurement and instrumentation solutions

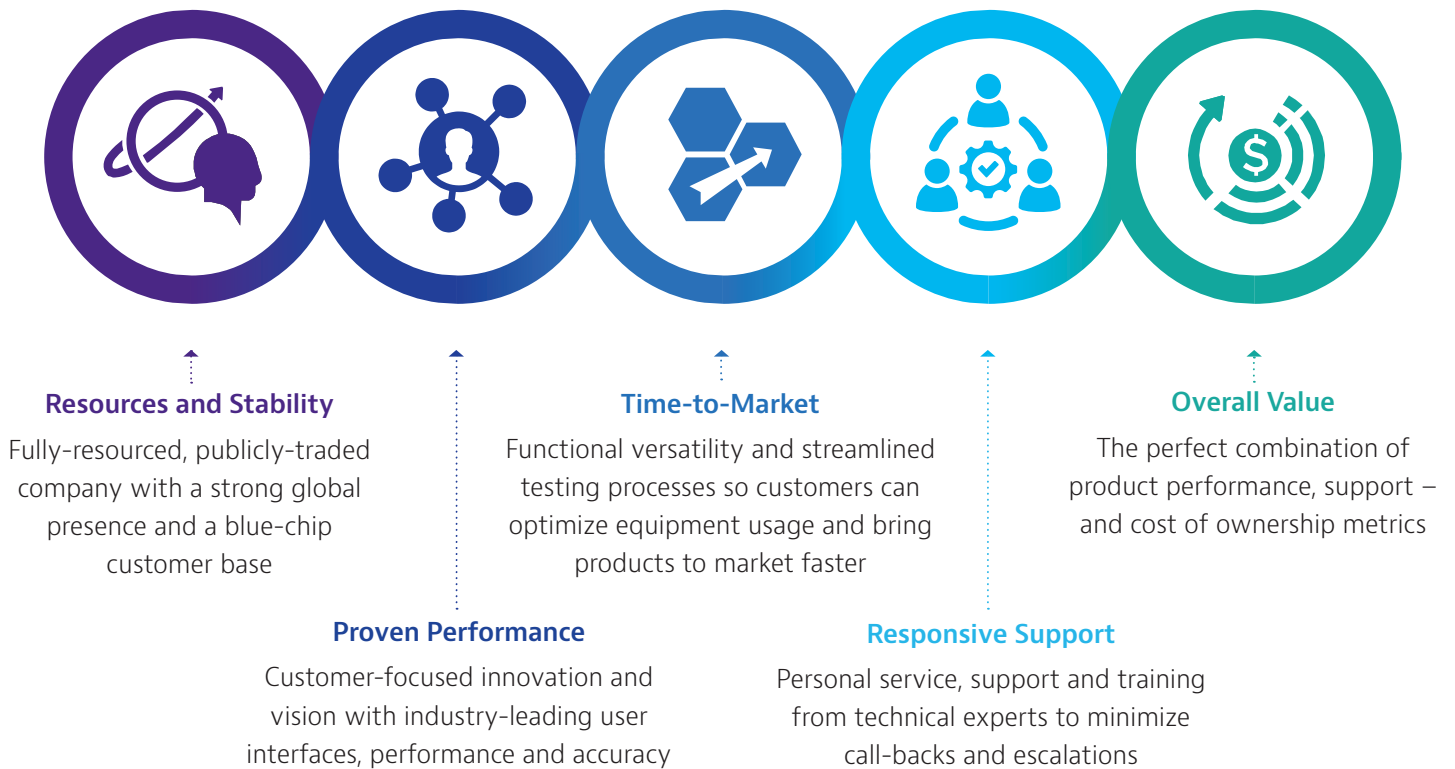

VIAVI is a global provider of network test, monitoring and assurance solutions for communications service providers, enterprises, network equipment manufacturers, government and avionics. With a heritage that dates back a century, we have grown organically and through acquisition to become a highly-resourced company, intensely focused on helping our customers harness the power of instruments, automation, intelligence and virtualization.

VIAVI Solutions by the Numbers

Why VIAVI for Integrated Protocol Analysis Solutions?

PCI-SIG, PCIE® and the PCI HOT PLUG® design mark are registered trademarks and/or service marks of PCI-SIG.
CXL is an exclusively-owned trademark of the CXL Consortium.
NVMe is a registered trademark of NVM Express.
